ACKNOWLEDGEMENT

It is with immense gratitude that we present this project report titled "Clothing," which marks a significant milestone in my academic journey in the field of Master of Computer Applications.

Team Effort is the only key to success. Success cannot be achieved single-handedly. So, we would like to express our sincere thanks to all the dignitaries involved in making this project a great joy and turning it into a successful work.

We would like to take the opportunity to thank my college **Sarvajanik College of Engineering and Technology** for giving us this tremendous opportunity to work in the real-time project.

Prof. (Dr.) Kaushika Pal our professor and project coordinator has been very prudent to us throughout our college studies. He is the person who has been giving direction to our work and the shape of our imagination.

We also like to thank our H.O.D. **Prof. Gayatri Kapadia** and all the professors who are always ready to give best guidance. They are the individuals who give solutions whenever required. We would also like to acknowledge all our friends and colleagues, team members for their help and encouragement from time to time.

Finally, we would like to thank our parents for their support throughout the project. We owe a special debt to our family & friends for their supports blessing and encouragement for us.

Yours Sincerely,

Yatisha Bhagat (ET24MTCA004)

Shruti Lad (ET24MTCA024)

Sanjana Mali (ET24MTCA029)

MahimaThaker (ET24MTCA067)

INTRODUCTION

Proposed System and its Objectives

The “Clothing” has been developed to override the problem prevailing in the practicing manual system. It gives the availability to view categorized detailed about products of different categories. It gives the facility to view and place order related product And gives more features to users.

- User-Friendly Interface: Develop an intuitive and aesthetically pleasing interface that provides a seamless shopping experience for customers of all demographics.
- Advanced Search and Filter Options: Implement robust search and filter functionalities that allow users to find products based on categories, sizes, colors, prices, brands, and more.
- Personalized Shopping Experience: Utilize machine learning algorithms to offer personalized recommendations based on user behavior, purchase history, and preferences.
- Secure Payment Gateway: Integrate a secure and diverse range of payment options to ensure a safe and convenient checkout process.
- Responsive Design: Ensure the website is fully responsive and optimized for various devices, including desktops, tablets, and smart phones.

Core Components

- Admin is able to change his/her profile.
- Admin can manage all data on the web.
- Admin can view users.
- User support.
- User can view and place the order for products
- Admin can view customers, their orders and products.
- Admin can add, edit and delete the products

Minimum and Maximum Software/Hardware Requirements

Requirement	Minimum
Microprocessor	Intelcore13Processoror RYZEN54600H
RAM	1GB
OS	Windows 8/10/11.macOS.Linux
Server	Microsoft SQL server
Tools	Visual studio2022
Language	Php8.1.25
Framework	Laravel 8.0.30
Storage	512GB

Advantages and Limitations of the Proposed System Advantages:

- Wider Product Reach
- Convenience for Customers
- Lower Operational Costs

Limitations:

- Needs regular updates for security.
- Stripe API usage may incur costs.
- Limited offline functionality.

REQUIREMENT DETERMINATION & ANALYSIS

Requirement Determination

Functional Requirements:

- Functional requirements for a clothing website typically include features and capabilities that are essential for its operation and usefulness to users. Here are some common functional requirements for a clothing website
- User Registration and Profiles: Allow users to create accounts, edit their profiles, and manage their preferences. This might include features like profile pictures and saved addresses.
- Product Catalog: Display a comprehensive catalog of clothing products, organized by categories such as man's, women's and kids. Each product listing should include details such as product description and price.
- Search: Implement robust search functionality allowing users to quickly find products by name, brand, category, or specific attributes.
- Shopping Cart and Check out: Enable users to add products to their shopping carts, review their selections, and proceed to checkout. The check out process should be streamlined and secure, with options for different payment methods and shipping addresses.
- Wish list: Give users the ability to create wishlist show products they‘re interested in, with the option to share or save them for future reference.

2.1.2. Non-Functional Requirements:

- Non-functional: requirements define aspects of the system that specify how it should behave, rather than what it should do. They encompass qualities such as performance, security, usability, reliability, and scalability. Here are some non-functional requirements that would be important for a beauty website:
- Scalability: Design the website to handle increasing number so users and products without significant gradation in performance. It should be able to **scale** both vertically (handling increased load on existing servers) and horizontally (adding more servers to distribute the load).
- Reliability: The website should be highly reliable, with minimal downtime or disruptions. Implement measures such as redundant servers, automated backups, and failover mechanisms to ensure continuity of service.
- Security: Protect user data, including personal information and payment details, by implementing robust security measures. This may include encryption, secure authentication mechanisms, and regular security audits to identify and address vulnerabilities.
- Usability: Ensure the website is intuitive and easy to navigate, with clear labels, consistent layout, and accessible sign elements. It should be usable by users of all level so technical proficiency and accessible to individuals with disabilities.

- **In our website there are 3 targeted users.**

    1. **Admin**
    2. **User**
    3. **Visitor User**

AGILE DOCUMENTATION

Agile Project Charter

AGILE PROJECT CHARTER	
GENERAL PROJECT INFORMATION	
PROJECT NAME	"Clothing"
PROJECT BY	Yatisha Bhagat Shruti Lad Sanjana Mali Mahima Thaker
START DATE	01/2/2025
END DATE	10/5/2025
PROJECT DETAILS	
VISION	To create an agile, user-friendly, and scalable online products system that provide categories like men's, women's and kids. It gives seamless experience for users for order their products.
OBJECTIVES	Develop are sponsive web platform for users to view, search and place order for products. Search products to Men's wear, women's wear and Kids to this platform.
PROJECT SIZE ESTIMATE	Small scale project in to roles is Admin, Customer and User
KEY STACK HOLDER	Web Application – Php Laravel
APPROACHES	Strategies, methodologies, processes, tools, and Techniques the team will follow.

Agile Roadmap/Schedule

1st Quarter	2nd Quarter
01-02-2025to15-02-2025 - Understand project requirements and define the scope - Collect functional and non-functional requirements - Learn PHP Laravel basics - Setup development environment and Laravel framework	16-02-2025to03-03-2025 - Design system architecture - Create UML diagrams: • Use Case Diagram • Class Diagram • Activity Diagram - Build initial Data Dictionary
3rd Quarter	**4th Quarter**
04-03-2025to24-3-2025 - Implement core features(CRUD for products, categories, users) - Develop admin panel and back end logic - Perform module–level testing - Begin writing technical documentation	25-03-2025 to 18-04-2025 - Design and implement front end templates (product listings, cart, checkout) -User registration/login - Continue testing and documentation
Final Quarter	
19-04-2025 to10-05-2025 Final Presentation and Documentation to be done.	

Agile Project Plan

Task Name	Start Date	End Date	Days
Sprint1 Laravel setup, authentication, and database configuration	01-02-2025	08-02-2025	8
Sprint2 Product catalog and registration module	09-02-2025	15-02-2025	7
Sprint3 User & admin panel UI	16-02-2025	22-02-2025	7
Sprint4 Product detail page implementation	23-02-2025	28-02-2025	6
Sprint5 Promotions and events module	1-03-2025	06-03-2025	6
Sprint6 Order check out and payment integration	07-03-2025	13-03-2025	7
Sprint7 Product filter, search, and category system	14-03-2025	20-03-2025	7
Sprint8 Seasonal offer display	21-03-2025	26-03-2025	6
Sprint9 Admin dashboard development	27-03-2025	01-04-2025	7
Sprint 10 Front end styling and theme integration	02-04-2025	09-04-2025	8
Sprint 11 Contact and feedback page	10-04-2025	16-04-2025	7
Sprint 12 Final bug fixing and system testing	17-04-2025	24-04-2025	8
Sprint 13 Final touch-up and deployment	25-04-2025	10-05-2025	16

Agile User Story

Story Point	Story
1.Admin Rights	-As an **admin**, I want to manage clothing products, update product details, and upload images so that the catalog remains current and appealing. -As an **admin**, I want to approve customer registrations and manage order records so that the system remains secure and organized. -As an **admin**, I want to view customer inquiries and control plat form settings to ensure smooth and professional user interaction.
2.User Rights	-As a **customer**, I want to browse clothing items and explore collections without logging in so that I can view products before registering. -As a **customer**, I want to register, login, and place orders so that I can shop conveniently. -As a **customer**, I want to view seasonal offers, promotions, and filter products by category so that I can find items easily and benefit from discounts.
3.Visitor Rights	-As a **visitor**, I want **to** browse clothing products and view product details so that I can decide whether I want to register or not. -As a **visitor**, I want to search for products and filter them by category or price so that I can find items of interest without logging in. -As a **visitor**, I want to see product images, descriptions, and prices so that I can make informed choices before creating an account.

Agile Release Plan

Task Name	Start Date	End Date	Days	Status
Sprint1	01-02-2025	08-02-2025	8	Realized
Sprint2	09-02-2025	15-02-2025	7	Realized
Sprint3	16-02-2025	22-02-2025	7	Realized
Sprint4	23-02-2025	28-02-2025	6	Realized
Sprint5	01-03-2025	06-03-2025	6	Realized
Sprint6	07-03-2025	13-03-2025	7	Realized
Sprint7	14-03-2025	20-03-2025	7	Realized
Sprint8	21-03-2025	26-03-2025	6	Realized
Sprint9	27-03-2025	01-03-2025	7	Realized
Sprint 10	02-03-2025	09-04-2025	8	Realized
Sprint 11	10-04-2025	16-04-2025	7	Realized
Sprint 12	17-04-2025	24-04-2025	8	Realized
Sprint 13	25-04-2025	10-05-2025	16	Realized

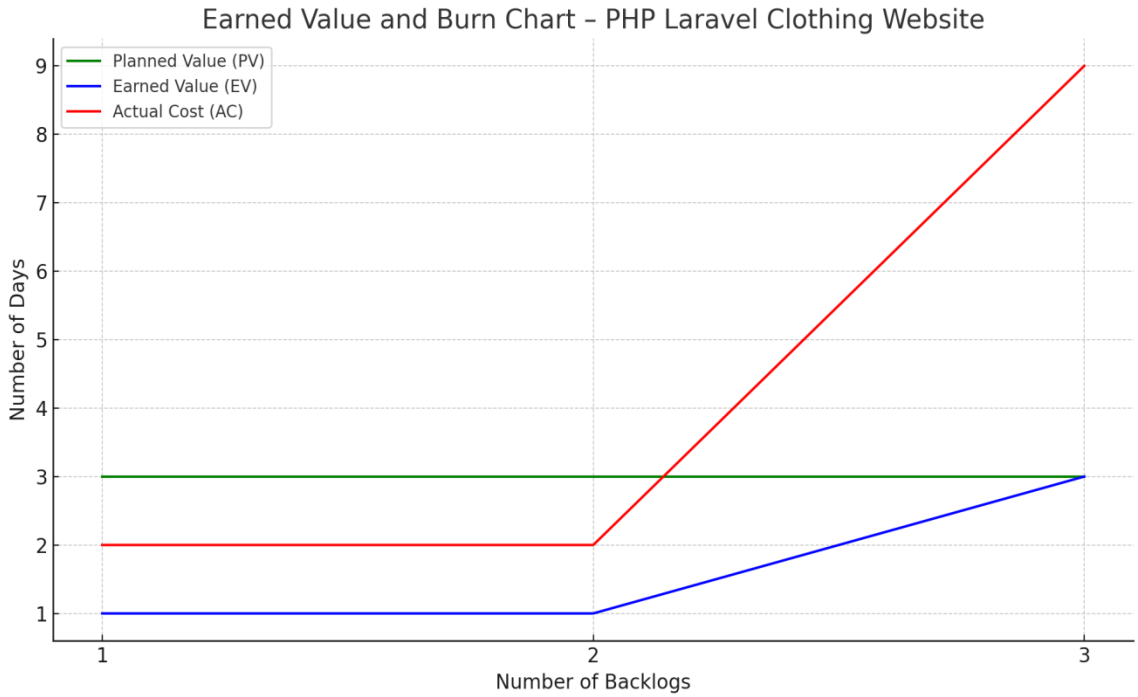
Agile Sprint Backlog

Task Name	Start Date	End Date	Days
Project Documentation	01-05-2025	10-05-2025	10
Project Updates	15-04-2025	21-04-2025	6
Reports for Project	30-04-2025	10-05-2025	10

Agile Test Plan

Project Name	Clothing			
Test	**Date**	**Action**	**Expected Result**	**Actual Result**
1	06-2-2025	Admin login	Admin should be able to login to the admin panel	Valid admin login
2	18-2-2025	Product management form	Admin can create, update, and delete Product details	Product create, update, delete functionality works
3	05-3-2025	Browse products	Users should see product listings with proper filtering	Product listings and filters display correctly
4	17-3-2025	User registration and login	Users should be able to register and log in successfully	User registration and login validated
5	04-04-2025	Shopping cart functionality	Users can add products to the cart and proceed to checkout	Cart functionality works as expected
6	12-04-2025	Admin order management	Admin can view and manage customer orders	Admin can view and process orders.

Earned-value and Burn Chart



- **Green Line (PV)**: The planned effort remain consistent.
- **Blue Line (EV)** :Work progress was delayed at first but caught up in the final backlog.
- **Red Line (AC)**: Costs surged in the final phase to recover progress.

- **Planned Value (PV)** – Green Line: Fixed at 3 days for each task.
- **Earned Value (EV)** – Blue Line: Show much work was actually completed.
- **Actual Cost (AC)** – Red Line: Jumps in backlog 3, indicating much more time was needed to catch up.
